

“What’s on the Web Safe for All Family Members - A Family Learning Approach to Building Digital Literacy Competences” (WOWSA) is a project funded by the Austrian National Agency under the Erasmus+ programme. It started the 1st of September 2020 and will last two years.

The project aims at providing key competences to parents to better promote the safe use of the Internet by all family members. To reach this objective, the WOWSA project partners have developed several resources:

1. **Introduction to Pedagogy for Parents:**

This training curriculum will provide parents with access to best practices in digital literacy for families and will provide guidelines for safe online use.

2. **Digital Literacy Curriculum for Parents:**

This training, lasting 48 hours (24h of face-to-face training and 24h of self-directed learning), will equip parents with an advanced level of digital, media and social media competences, before they take up the role of becoming primary educators within the family unit.

3. **Family Learning Toolkit:**

This toolkit comprises Comic Strips, Interactive Magazines and Audio Books for children, teenagers, young adults, and senior learners. The toolkit aims at providing all family members with the necessary knowledge to safely navigate the online world

4. **In-Service Training Programme for Adult Educators:**

This training programme will support trainers in the implementation process of the WOWSA resources targeting family members. It will provide them with the necessary skills to deliver the WOWSA training.

The final results of the project will be officially presented during the **WOWSA Family Learning Symposiums** which are due to take place in each partner country in **June 2022**. Stay tuned!
